Sub: Internship in Software Engineering

Dear Andrea Goll,

I'm writing for the career opportunities available in your esteemed organization. I would like express my keen interest and motivation towards the student jobs available in your company. I'm student of **Technical University of Ilmenau**. I'm pursuing final year of **Masters in Computer and Systems Engineering**. I have seen this opportunity in a Job portal (<http://www.berufstart.stepstone.de/>). It sounds really interesting to me. I'm comfortable with Java, C#, JavaScript, HTML and CSS. I can work with Core Java and I'm also learning advanced concepts of Java. Moreover, I can also work with SQL and data structures.

Since my Bachelors were also in Computer Science and Engineering, I have been using C/C++, Data Structures and Algorithms very intensively. Moreover, I worked on small projects in Java in TU Ilmenau. For Example, I have developed Secure Communication Systems using Cryptography and Java. I am also comfortable with C#, HTML, CSS and Java Script for Web Development. If I talk about experience I did a student job in Ilmenau in the department of Web Development. I worked on Software Quality and Security for 6 months.

My technical expertise includes C/C++, Java, Databases, Data Structures, Software Engineering, Embedded Programming, Real Time Operating Systems, Mobile Communications, Systems Security and Distributed Systems. I can adjust with new technologies very easily and quickly as required by the company or projects because I believe in learning which can be used anytime in the life. Learning makes an employee perfect and best.

Besides, I have attached my Curriculum Vitae for your kind analysis. I rely on that you will give me a chance to discuss about my qualifications through a personal interview at your earliest convenience. I shall be very thankful to you and obligate for spending time on my application. I look forward to hearing from you soon.

Yours Sincerely,

Diwakar Bajaj
